

# SOFAST BV

## SOFAST BV BENCHTOP VISCOMETER

### TYPICAL APPLICATIONS FIELDS

Quality control, raw material checking

Multiple process sampling measurement

Frequent and rapid production check

Process-side controls

Fast evolution samples

Whatever your industry, we understand and develop solutions for many applications. For a personalized approach, contact us at instruments@sofraser.com SOFAST BV BENCHTOP VISCOMETER: A QUICK AND RELIABLE SYSTEM FOR VISCOSITY MEASUREMENT IN THE LAB

Sofraser's new Sofast BV is the only benchtop viscometer using vibrating technology at resonance frequency. Using a beaker or a sample tube, the Sofast BV is the most efficient instrument for fast viscosity measurement.

- **Time saving:** From quick measurement acquisition to fast cleaning, the Sofast BV, for the first time in lab viscometry, allows the technician to receive a measurement, clean the rod, and prepare another sample in less than sixty seconds.
- **Reliable measurement:** With its stable skid and resonance frequency technology, it is unaffected by external vibrations. An anti-vibration table is unnecessary and the Sofast BV provides sensitive viscosity measurement from as low as 0.1 cP.
- Versatility: The Sofast BV viscometer measures sample volumes as small as 2 ml and several ranges can be preconfigured.
- **Complete solution:** From the conventional lab jack to optional integrated heating and agitating solutions, the Sofast BV's range and accessories equip the lab with useful tools for reliable viscosity and temperature measurements.
- **Durable investment:** The Sofast BV sensor has no wearing parts, requires minimal maintenance, and guarantees a rapid return on investment. Software for data acquisition expedites results, saves time, and streamlines viscosity measurement.

Easy cleaning

Small sample tube 2 ml

Lab jack and agitator

#### FEATURES AND SPECIFICATIONS 1 fixed range: 0.1-100 mPa.s or 1-1000 mPa.s 10 – 10 000 mPa.s (upon request) Measuring range Up to 2 pre-configured ranges (upon request) Standard: 100 ml or more . Option 30 ml sample tube (upon request) Sample volume Option small sample tube 2 ml (upon request) Repeatability ± 0.5 % of Full Scale Range Operating Sample temperature up to 50 °C / 122 °F conditions Working temperature 40 °C / 104 °F max • Sensor wetted parts and base: 316L stainless • steel Material Skid support: aluminum . • IP20 Protection Weight 6.3 kg / 13.8 lbs. • Length: 240 mm; Depth: 210 mm; Height: 400 mm Size 9.4 " L x 8.2 " D x 15.7" H 24 VDC power supply included Power supply 8 hours Battery life • Output • Mini USB communication port LCD screen Dimensions: 123 mm x 42 mm (4.8 " x 1.6 ") Display 4 lines of 20 characters 2 digital buttons (4 upon request) • Additional pre-configured range, determined by initial full scale range (upon request) Options Small (2 ml) or 30 ml sample volume • calibration (upon request) CheckTemp External temperature probe • 100 ml beaker 100 ml bottle . 2 ml sample tubes and adapters (upon request) 30 ml sample tubes (upon request) Accessories Lab jack (for beaker use) Lab jack and integrated agitator (upon request) Standard mineral oils

• Data acquisition software (USB cable included)

## SOFAST BV BENCHTOP VISCOMETER

In 1981, Sofraser invented & patented the world's first vibrating viscometer at resonance frequency also called tuning-type.

The vibration amplitude varies according to the viscosity of the product in which the rod is immersed.

The active part of the sensor, a vibrating rod held in oscillation at resonance frequency, is driven by constant electrical power.

Sofraser remains unsurpassed regarding process reliability and accuracy.
